

# Third Grade Blizzard Bags Day 2

Reading/Science: Read Artic Animals. Use the selection to answer the questions.

Math: Complete the worksheet

Social Studies: Choose a different topic from the list and describe how it has changed over time.

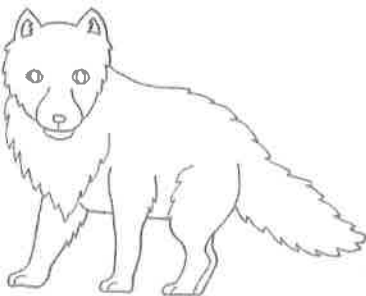

Name \_\_\_\_\_

# Arctic Animals

Arctic hares have many physical traits and behaviors that help them to survive in the cold. They are bigger than rabbits. Their ears are very short. Arctic hares have thick white fur. They move fast to keep warm. They dig tunnels in the snow. Arctic hares huddle with other hares to keep warm.

Tundra swans live in the Arctic during the summer and migrate south during the winter. They travel far between their two homes. Tundra swans live along the coast. These birds build nests lined with moss and grass. Most of the time, they build their nests near a lake, river, or ocean.

In the Northern Hemisphere, there lives a small fox in the Arctic tundra with many names. Most people call it the arctic fox. Other people call it the white fox. Some call it a polar fox. It is also known as the snow fox. Its fur may turn gray or brownish during the summer.

Directions: Cite evidence from the text and answer in complete sentences.

RI.1

1. What happens to an arctic fox in the summer?

---

---

2. Where does the tundra swan live?

---

---

3. Where does the arctic fox live?

---

---

4. How do arctic hares get warm?

---

---

---

### Did You R-A-C-E?

- Restate the question or prompt where appropriate.
- Answer in a complete sentence.
- Cite evidence to prove the answer.
- Explain each part of the question.

Form C

# M

33. This menu shows the prices at a Snack Bar.

| Menu                  |                        |
