

### **Programming Blizzard Day 3 Assignment**

Today you will be finishing your pictures. Remember you need about **200 pictures TOTAL** to get the stop action you will want. You can copy these pictures over to a flash drive to use at the school. This entire project will be done on the flash drive, as it takes so many pictures to create the movie.

If you took your pictures in order, it will be easy to have them pull into the program without having to do much rearranging.

Upon your return to school , we will create the commercial by pulling in the pictures and creating a title page and ending with a credits page.
