

Web Design Blizzard Day 3 Assignment

Today you are going to start to develop the information for your individual web pages.

You prioritized your BUCKET LIST, with options 1-5 being the most important for you to accomplish. If you want to reprioritize them, now is the time to do that.

You will be creating a page for each of these 5 goals. I want you to create a word document for each of the top 5 bucket list goals and tell me in YOUR OWN WORDS why this goal is important. There should be quite a bit of content on each of these goals. For instance, if one of your goals was to visit all the national parks, you might want to list how many there are and how you plan to accomplish this goal, highlighting a few of the parks and telling about them. Each of these should constitute a screen worth of data. You will obviously be including some pictures on each of these pages. As you find pictures you want to use, you can save them in your directory. Be sure you are organizing these pictures by goal so it will be easy to put them all together. Also, you will need to reference each of these pictures indicating where the picture came from.

Save each of these goals on a separate document, so you will have 5 documents when done, goal 1, goal 2, goal 3, goal 4, and goal 5.

Once again, just remember this information should be in your own words why this goal is important to you.
