Student Wellness Program

The Board directs the Superintendent/designee to develop and maintain a student wellness plan in compliance with Federal law.

The student wellness plan:

1. includes goals for nutrition promotion and education, physical activity and other school-based activities designed to promote student wellness that are developed with consideration of evidence-based strategies and techniques;
2. includes nutrition guidelines for all foods provided, but not sold to students in the District during the school day in order to promote student health and reduce childhood obesity;
3. provides assurance that District guidelines for all food and beverages sold during the school day are, at a minimum, equal to the guidelines issued by the U.S. Department of Agriculture (USDA) and that marketing of foods and beverages on the school campus during the school day is prohibited for foods or beverages that do not meet the nutritional standards established by the District in accordance with USDA regulations and
4. establishes a plan of implementation and evaluation, including designating one or more persons within the District with the responsibility for ensuring that the District is compliant with Federal law.

Development of the student wellness plan must be a collaborative effort between parents, students, food service workers, physical education teachers, school health professionals, administrators, the Board and the public.

The District notifies the public of the wellness plan at least annually. The wellness plan is assessed at least once every three years and the results of the assessment are made available to the public.

The District reports compliance with the establishment of a wellness committee to the Ohio Department of Education by November 30 annually through the consolidated school mandate report.

If the District reports noncompliance the Superintendent/designee must provide a written explanation to the Board within 30 days explaining this noncompliance and a written plan of action for accurately and efficiently addressing the problem.
